Google Cloud Platform (GCP) • BigQuery, GA4, Looker Studio.	**Excel/Sheet** • Pivot tables, PowerQuery, Advance reporting
Python • Libraries: Pandas, NumPy, Scikit-Learn, Statsmodels, Matplotlib, Seaborn etc.	**Reporting Tools & Administration** • SQL Server Reporting Services (SSRS) and DataZen • Reporting development, administration, • Access management, monitoring, and • DataZen product ownership.

Work Experience:

Business Intelligent Analyst
Buddy & Selly GmbH (German Retail Company)
Aug 2024 – Present

- Supporting business decision-making by developing reports, data models, and analyses, while collaborating with both technical and non-technical stakeholders across Sales, Purchasing, and Marketing departments.
- Contributed to automating the entire reporting system for various departments using Power BI, and performed ad-hoc analyses with Google BigQuery, Excel, and Google Sheets.
- Analyzing DHL purchase data to optimize product journeys and logistics performance.
- Driving strategic up-pricing and down-pricing decisions by analyzing article STR (Sell-Through Rate) performance.
- Developing KPIs and dashboards to monitor business health and identify improvement opportunities.
- Providing data-driven recommendations to support inventory management and purchasing strategies.

Data Analytics Consultant
Onwards Analytics (Australian Company)
Jan 2025 – Present

- Working on Value Chain Mining, ETL processes, and Power BI dashboard development for Onwards Analytic largest client, South32 (mining company)
- Providing problem-solving support for ad-hoc data and reporting issues.

Associate Data Analyst
Transcom Ltd. (SK+F pharma Sales)
Aug 2023 – Aug 2024

- Produced 15+ comprehensive reports and presentations in SSRS, facilitating clear communication with stakeholders and driving actionable insights.
- Optimized existing SQL reports, improving processing speed by 15% and enhancing operational efficiency.
- Collaborated with Application & Software teams to develop paginated reports using Python.

- Partnered with Data Engineers to monitor data archiving and report processing jobs, ensuring data integrity and availability.
- Conducted R&D and POC initiatives for big data processing and archiving in Google Cloud (BigQuery), with reporting solutions in Looker and Looker Studio.
- Provided administrative support for BI tools including Power BI, Qlik Sense, and DataZen; served as Product Owner for DataZen, overseeing its administration, monitoring, and continuous user support to ensure seamless reporting and stakeholder satisfaction

Assistant Officer (Sales & Distribution)
Transcom Distribution Company Ltd. (Sister concern of Transcom Ltd.)
Aug 2022 – Aug 2023

- Communications with sales team for Invoice checking, posting, printing in existing applications (Sage ERP, m-reporting).
- Creating Daily sales report and mailing to the stakeholders.
- Strongly maintaining SOP & KPI as per company policy.

Academic Qualifications:

Master of Science in Applied Statistics and Data Science
Jahangirnagar University, Savar
Graduated: 2023

- Thesis: An A/B Testing Approach for Optimizing Website/User Interface Design and Data Driven Decision Making – An Analysis Project with Statistical Approach.

Bachelor Of Social Science in Economics
National University, Dhaka
Graduated: 2020

Portfolio Projects:

RFM segmentations using SQL, Snowflake, Excel | Link

- Ingested data into Snowflake, queried, cleaned, and performed descriptive analysis.
- Segmented customers based on Recency, Frequency, and Monetary value, and presented actionable findings.

A/B Testing using Python | Link

- Conducted A/B testing with statistical approaches for user interface and new feature optimization.
- Found that new website features were not significantly impactful, recommending continuation with existing features.

Employe Churn Prediction using Bigquery-Notebook-LookerStudio | Link

- Built a database in BigQuery, connected with Notebook, developed a churn prediction ML model using PyCaret, and created dashboards in Looker Studio.
- Achieved model performance: Accuracy – 0.9904, Precision – 0.9933, F1 Score – 0.9797

Maven Market Data Analysis and Visualization Using PowerBI | Link

- Conducted a 3-page analysis and presented key findings through interactive dashboards
- Created data models (Star Schema, Snowflake Schema), normalized tables, developed DAX measures, custom columns, and visualized data using various charts

Super store sales analysis and dashboard using Excel | Link

- Utilized Power Query for data cleaning and automation.
- Applied functions including Merge, VLOOKUP, Pivot Tables, Custom Columns, Conditional Columns, and developed insightful charts
